

Screen grab from Dev of a selected Future item.

14/12/17

### Noticeable issues

The List item in the table and the actual form are dis-jointed. This needs to be a clearly part of the Future list area and also in style with the updated UI.

Alistair and Iffy confirmed this table structure 9no sorting options already set by date).

Alistair and Iffy also confirmed that the fields in the drop down that can be editable, should be. So I have shown this by using the lines as shown in the most up to date UI examples on Confluence.
