

Health Education England

ADMIN INFORMATION SYSTEM

Admin view - Saved feedback for Users

This shows how the user receives feedback that the Save function has worked

Saving and Updating

The user must be able to see that the Save and Update functionality work when they use them. At the moment there is no way for the user to see if in fact this functionality did occur when they use the Save or Update buttons.

Admin View - Saving feedback. This is an example of How the user will receive feedback following the User Journey of completing a task and saving this action. All Mandatory fields must be completed before the 'save' functionality is available

Admin View - Saving feedback. This example is on the Form R-b UI. This screen may have many fields and sections, which the user will need to scroll through and edit or complete. With no fixed header we will need to have Save and Update feedback appear at the top of the screen to ensure the user can see that their action has worked.
