## ADMIN INFORMATION SYSTEM

# Admin view - Creating a post, ID feedback & journey

This shows the user journey and user feedback on creating a post

**ISSUE: Users need to see that the Post ID has been created and how to view the Post once it is created**

The main concern is that the Post ID can take sometime to Generate. So I am creating the user journey showing feedback interactions with the user to establish the following:

- a) The post is created
- b) The ID has been generated
- c) The user is then able to automatically see the 'New Post and ID' in the Post able list
