# Admin view - Saved & Update feedback for Users

## This shows how the user receives feedback that the Save function has worked

### Saving and Updating

The user must be able to see that the Save and Update functionality work when they use them. At the moment there is no way for the user to see if in fact this functionality did occur when they use the Save or Update buttons.
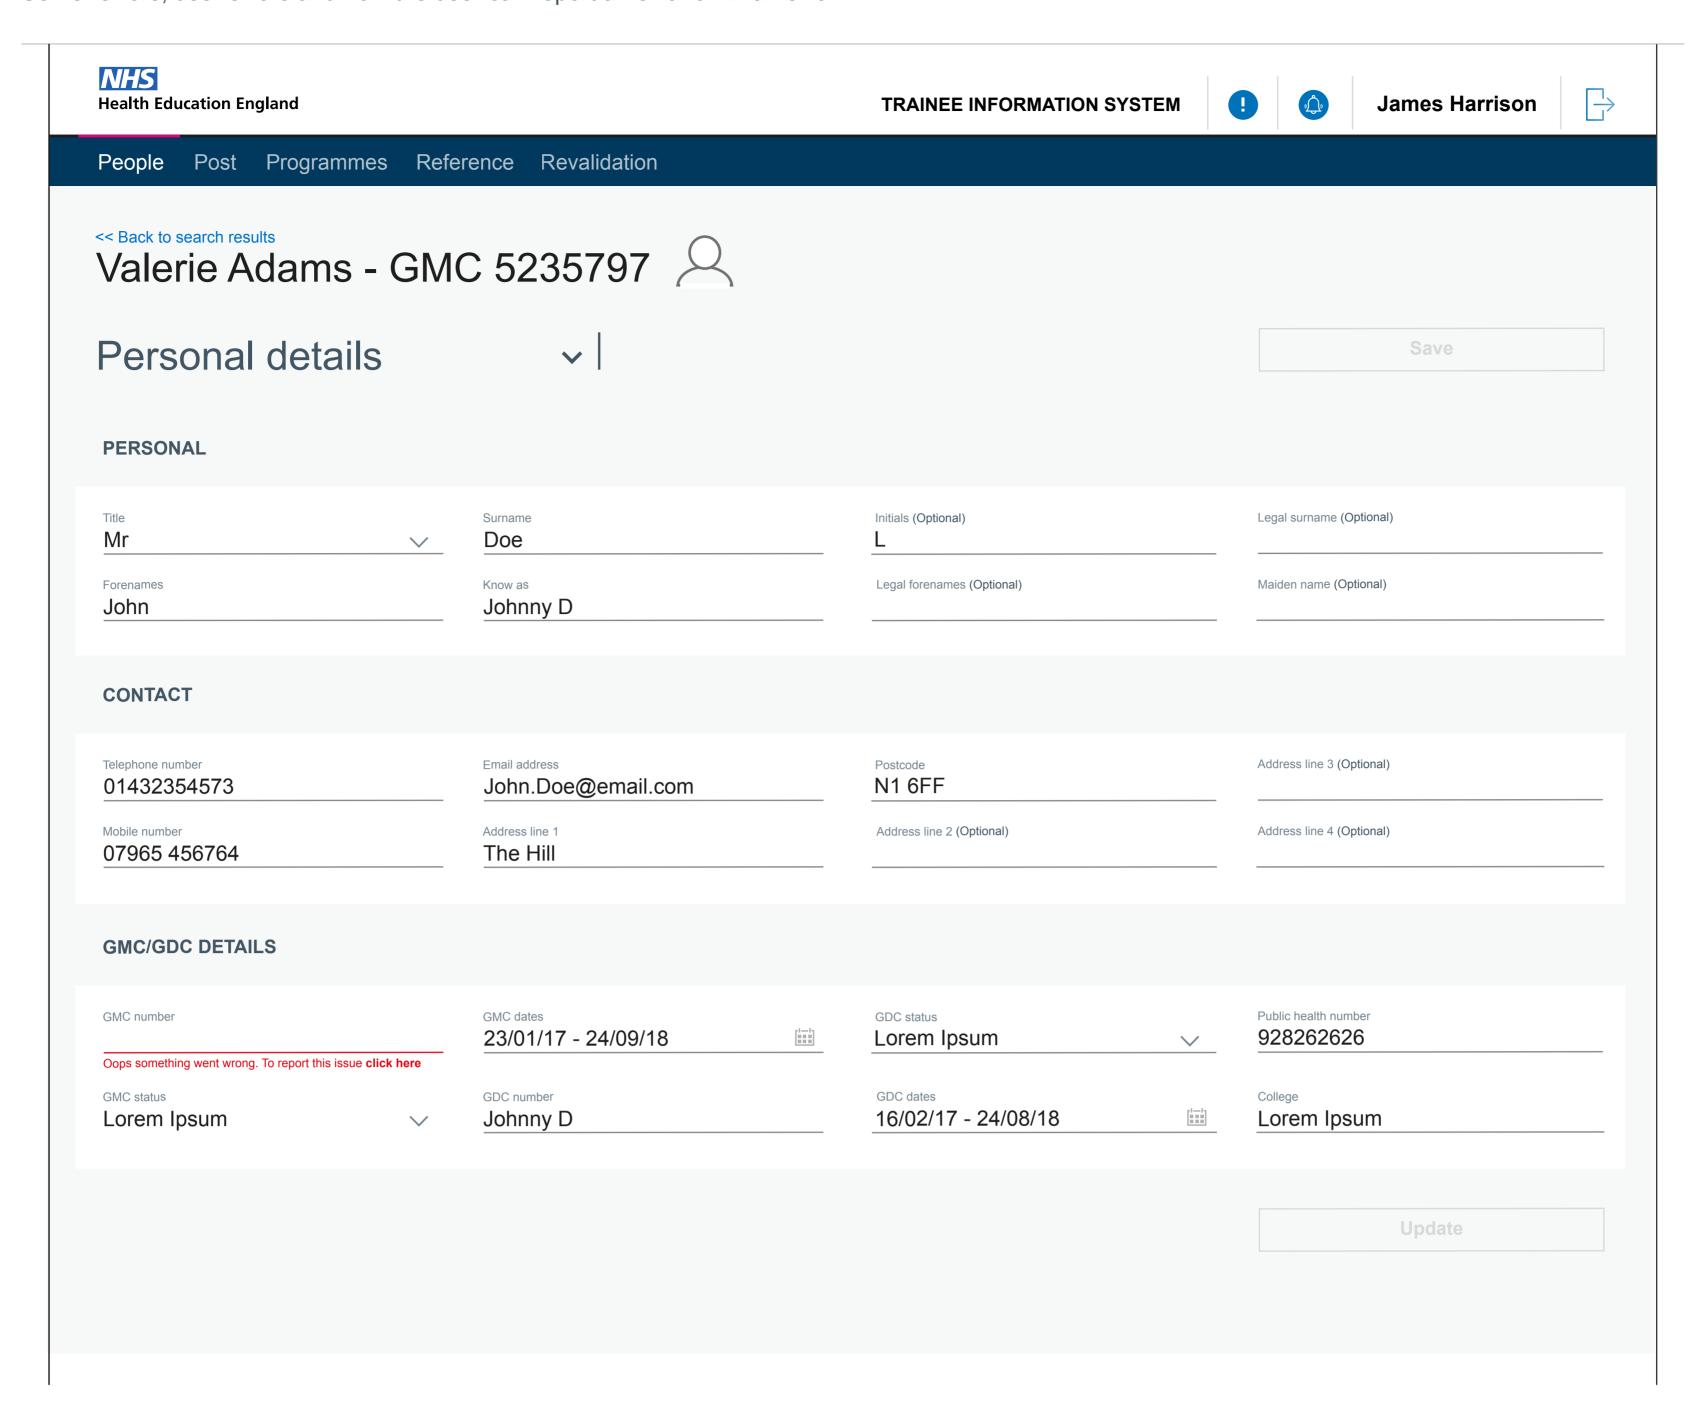

# Errors - Field errors and prompting the user to try to resolve

Server errors, user errors and how the user can report an error or fix an error.
