

Menu // Revised menu - Singular drop down with 30 side border

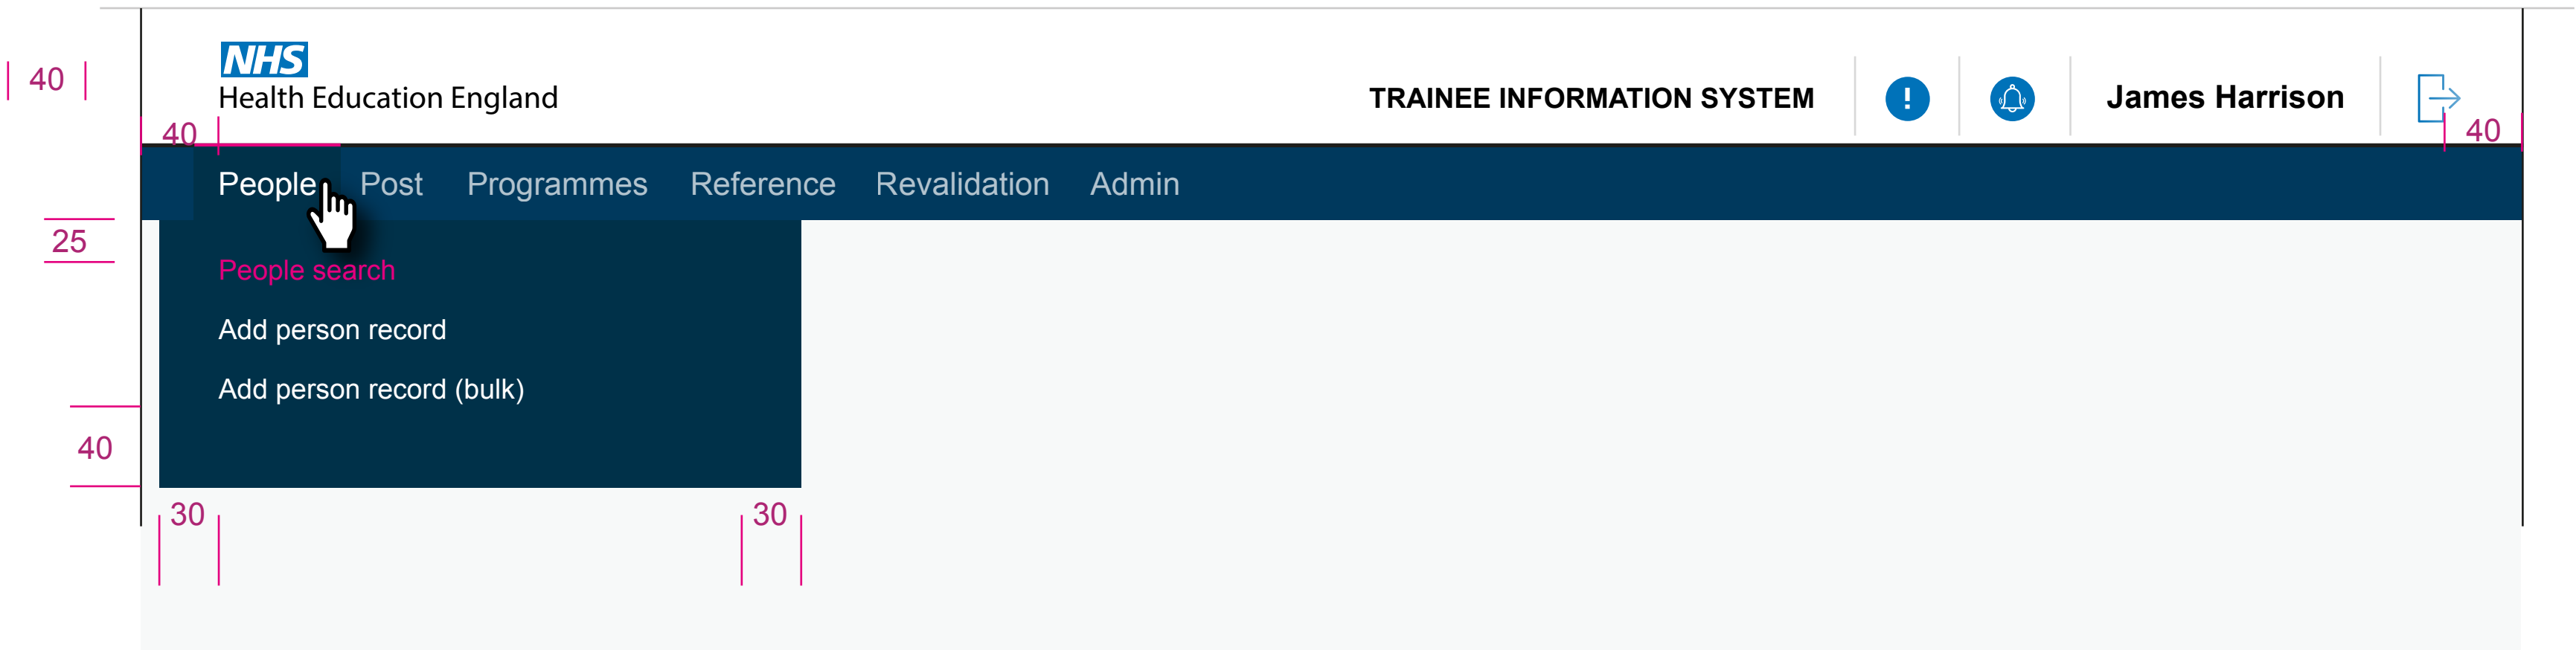

At 1200 on desktop

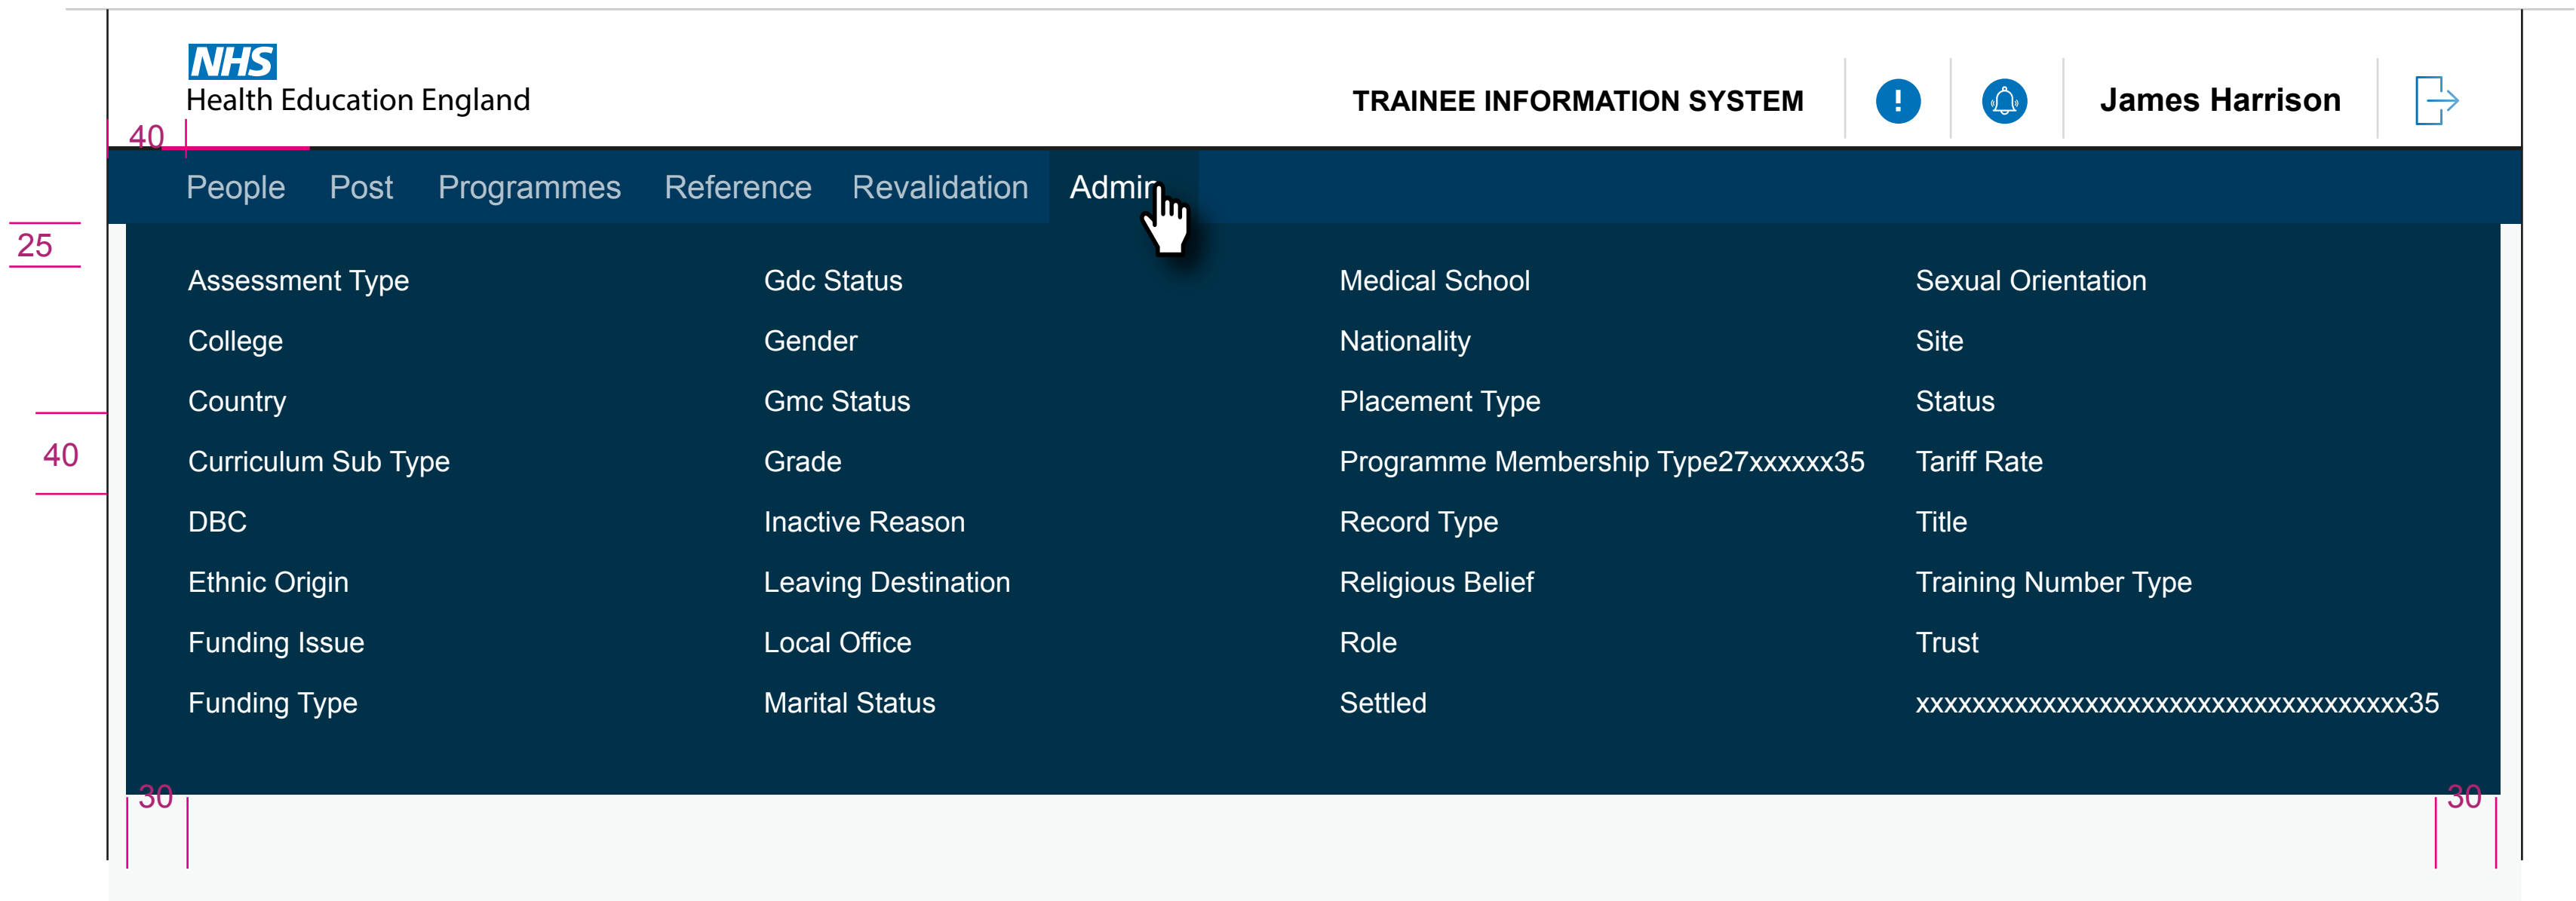

At 1200 // Aligned below on single drop down // 30 px side border

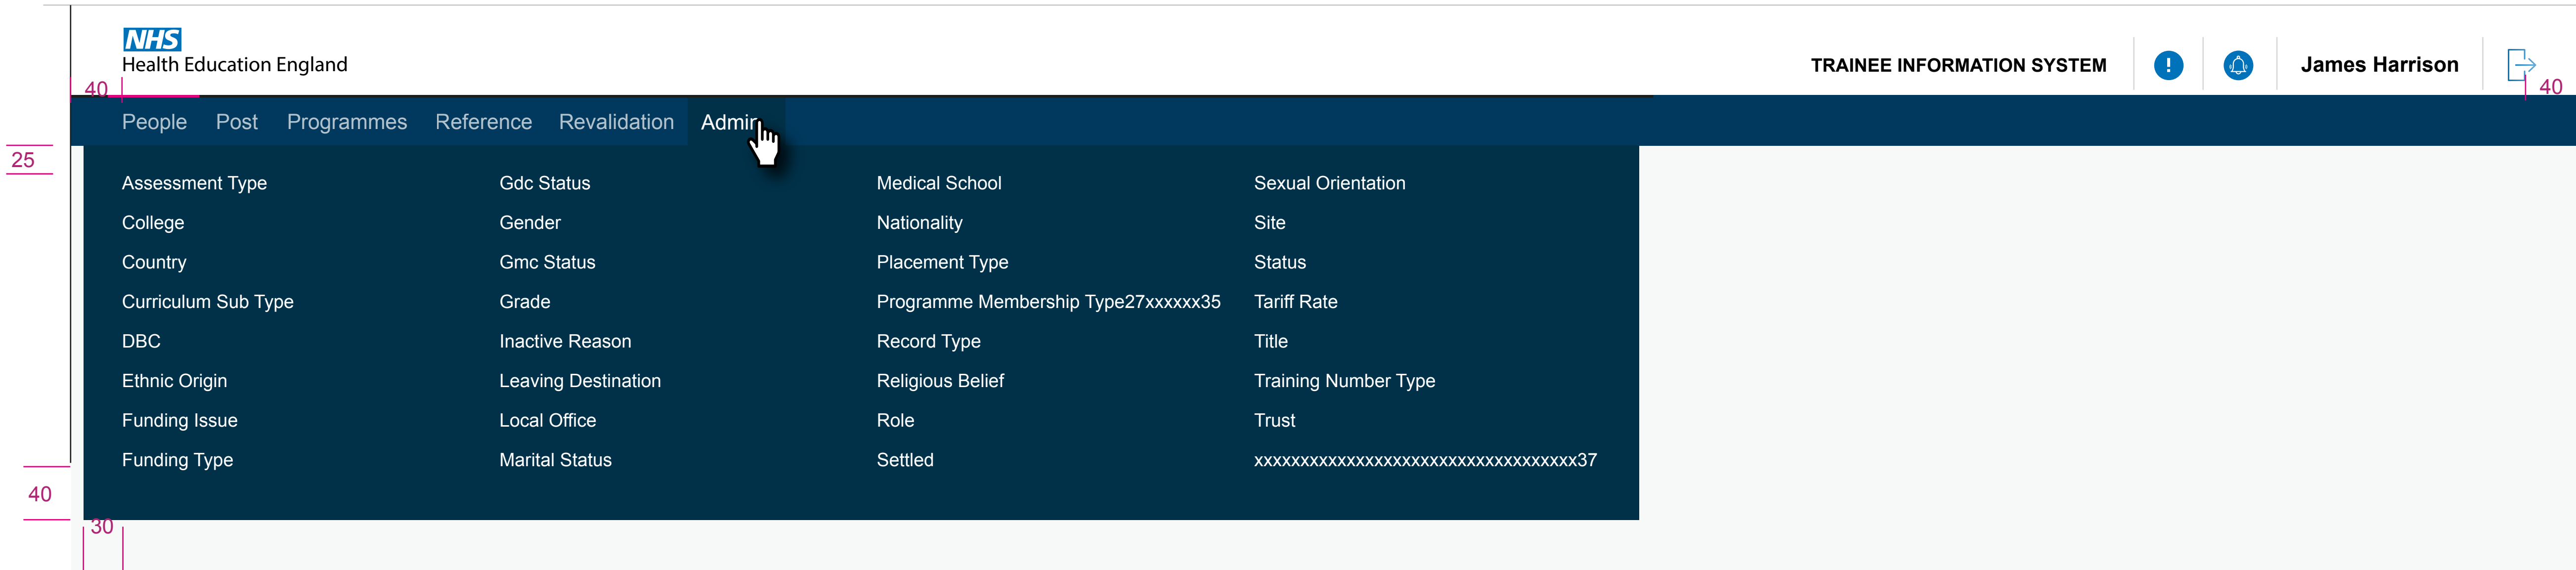

At 1200 // Highlight shows what page you are on

At 1200 // Showing large mega menu style for individual L1 items

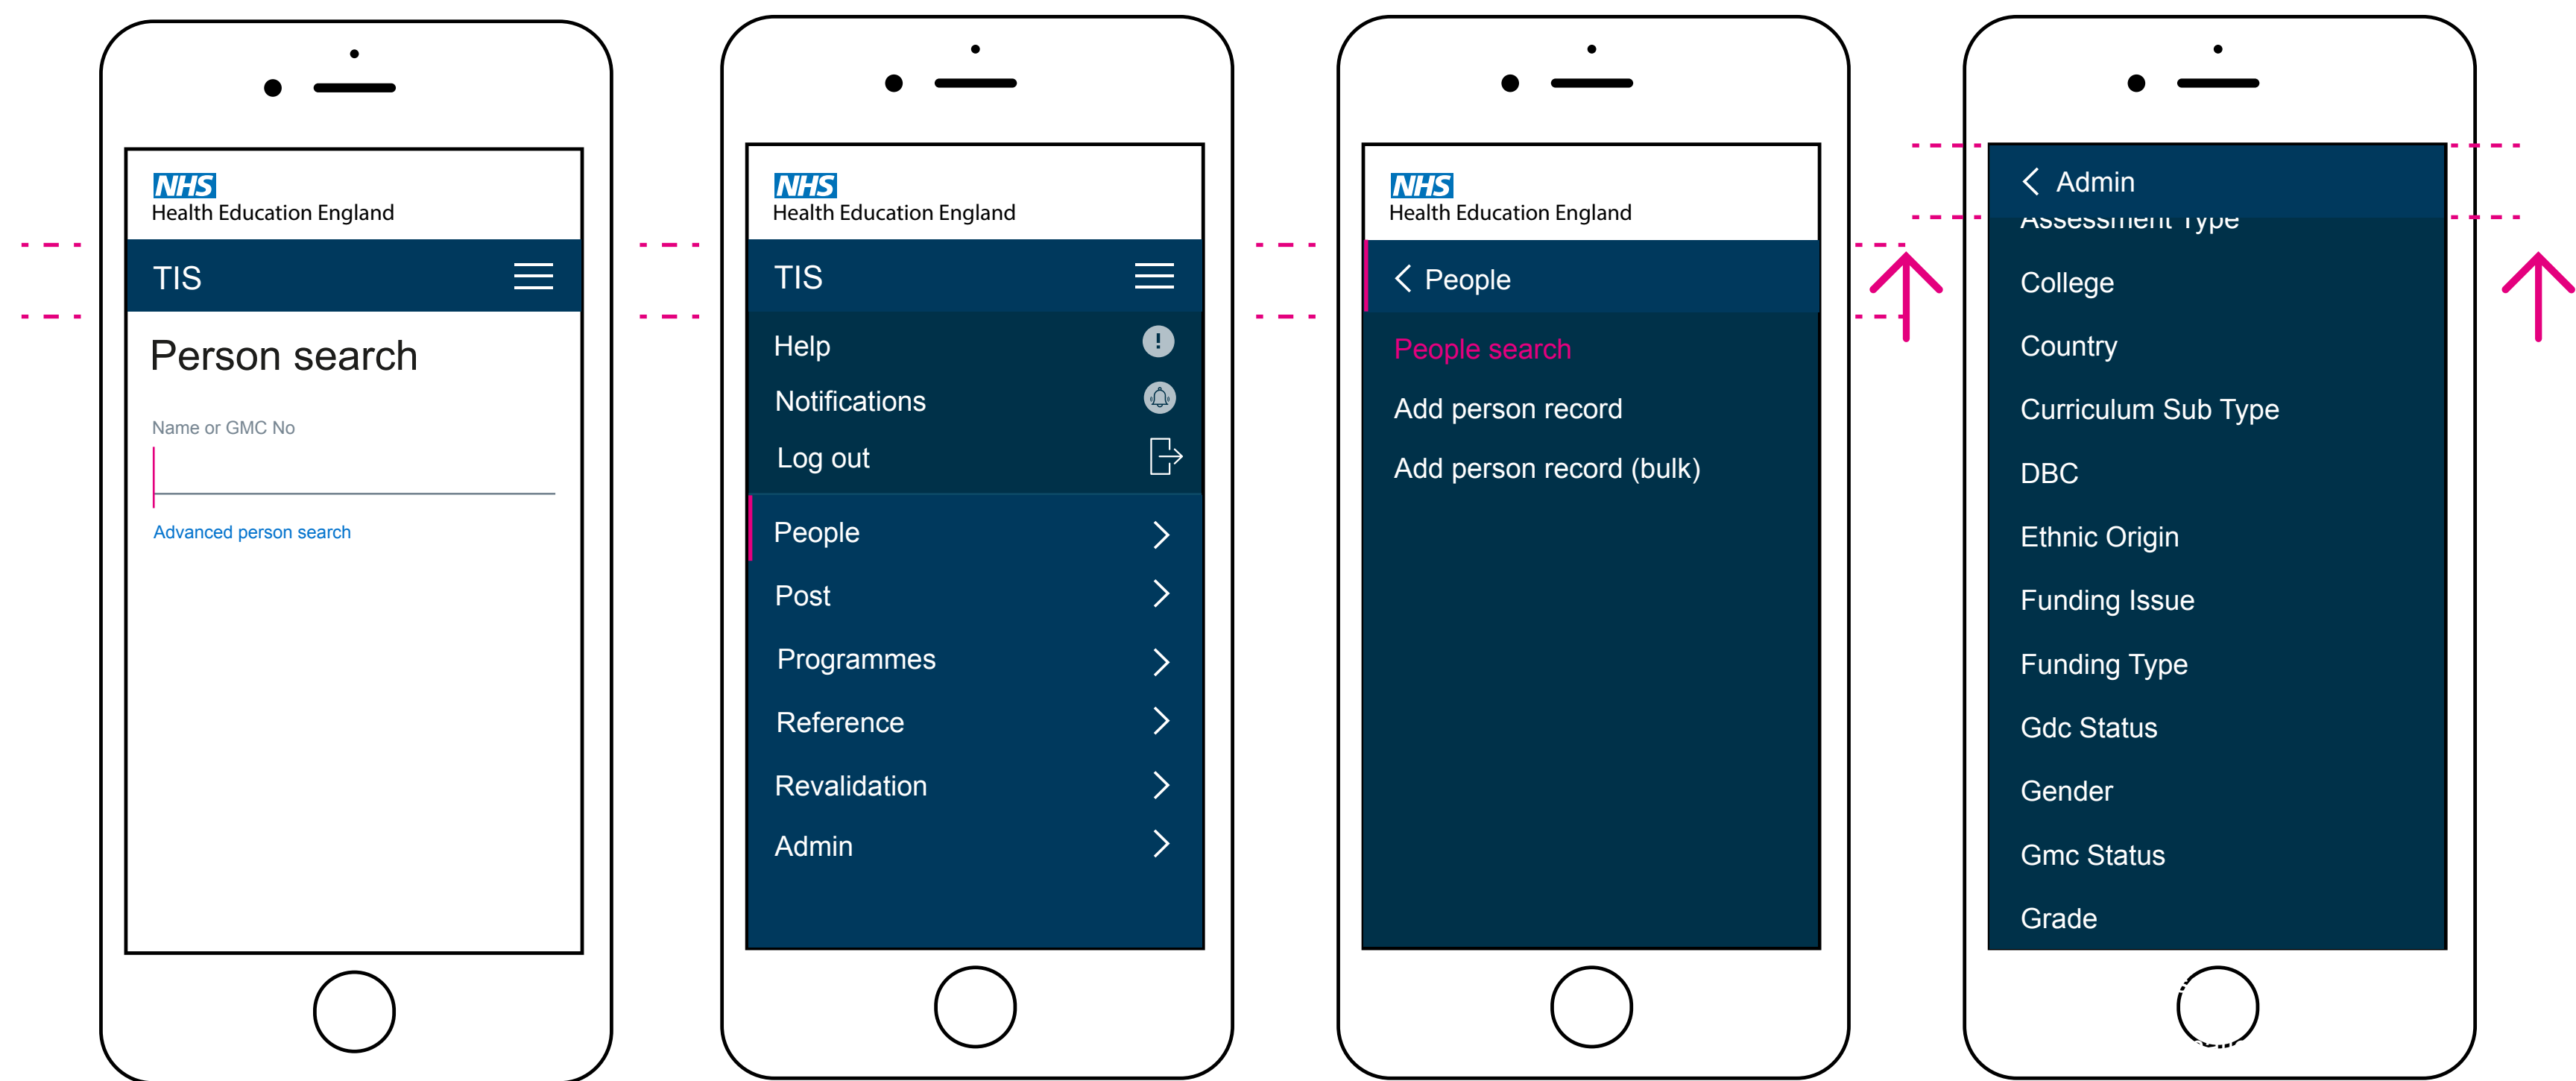

At fullscreen // At fullscreen // 4 Column (35 characters max) // Arial14px/30px text // 31 items // sorted alphabetically

Menu / Revid menu - Responsive from optimised 1200 desktop to small screen (ipad and below)

On smaller devides - tablets/phones

- Transition - whatever is the easiest - suggest using back arrow, if not possible use close X on the right
- Sticky header (up to TIS menu bar). See dotted lines and arrows.

Menu / Revided menu - Mega menu layout

At 1200 // L2 navigation when subtitles are needed (-2 pt smaller caps)

ADMIN INFORMATION SYSTEM

Admin view - Menu revisions

Drop downs and Mega menu states and lists

Design incorrectly implemented:

Menu - When you rollover a L1 menu item should highlight and STAY HIGHLIGHTED when you then explore its L2 children. At present it doesn't so you can't see what L1 item its related to. The page you're on's L1 nav item should go darker with Pink line showing what page you're on.

On Admin, Programmes and some other menu items when clicking of L2 menu item - menu should disappear but it currently stays in place, some items make it disappear most don't - need all to make menu disappear.

Revised Design:

Menu: With current low Navigation L2 item content the mega menu is not working creating a disconnection between parent and children navigation items and excessive mouse travel. We need to either 1/ move content to sit under relevant menu item NOT justified to the left in the existing mega menu band or 2/ make individual menu drop downs. Menu can always switch back to original mega menu when content grows.

Menu Indicators:

Add Page indicator to L2 items

Subtitles for MM Admin UI/Admin

Looking at not available L2 items

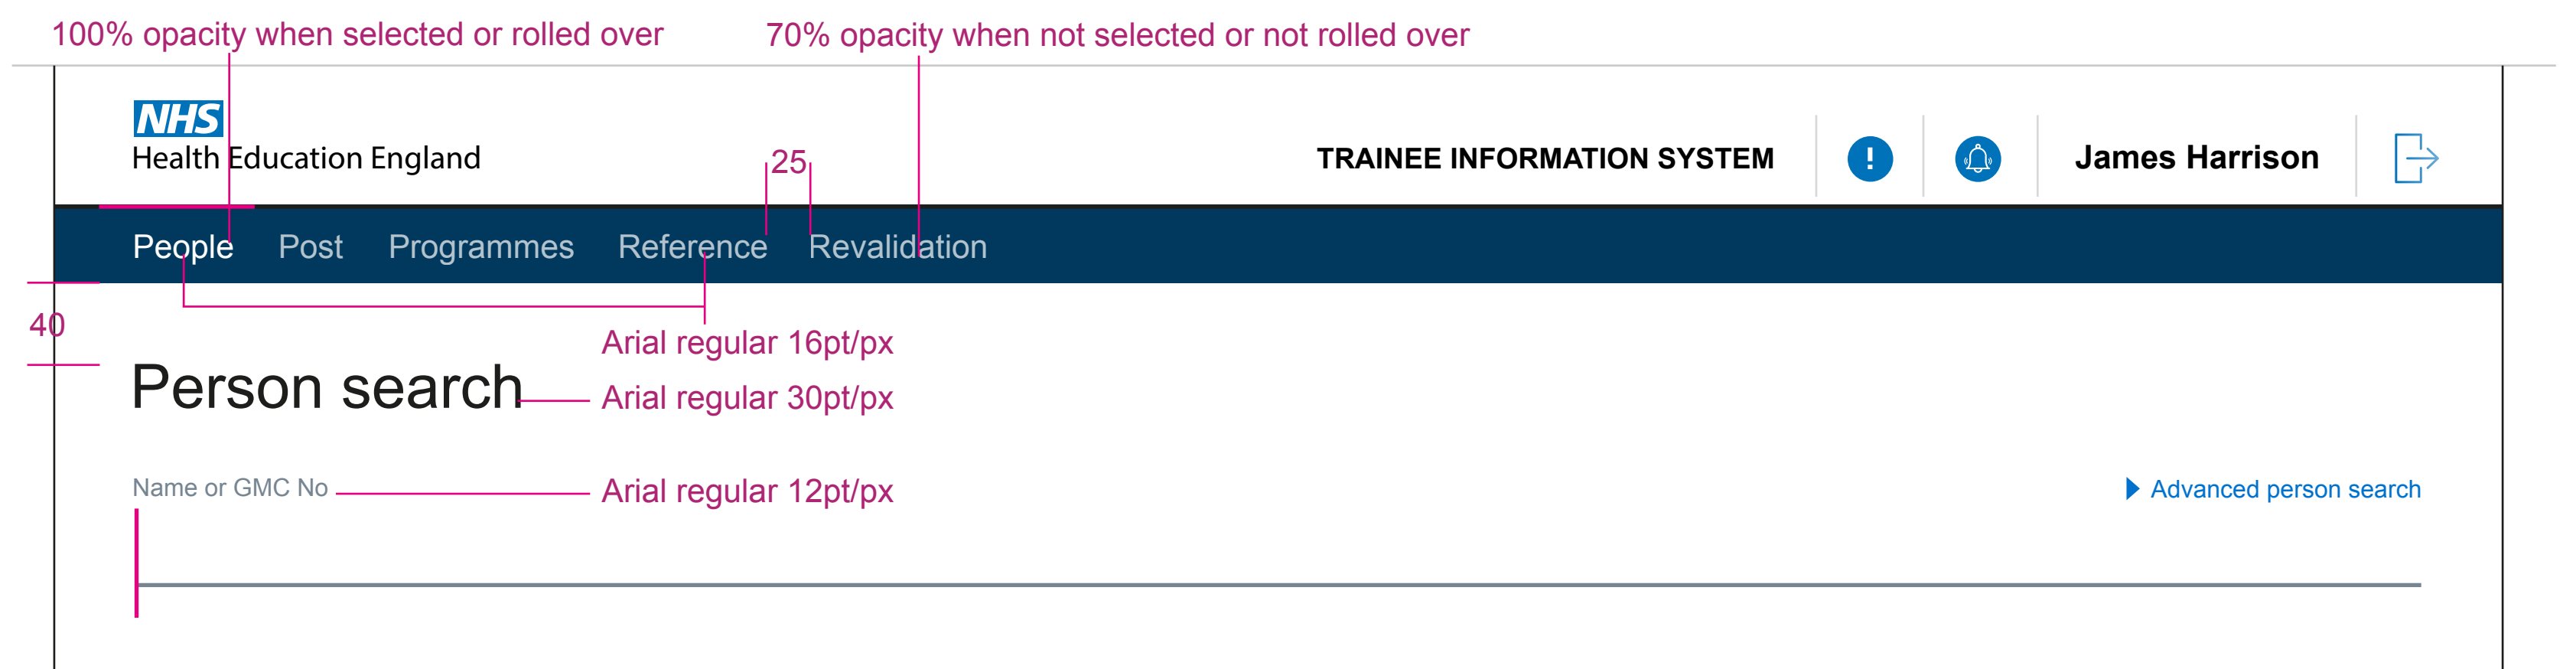

Trainee Menu:

Implement page highlight

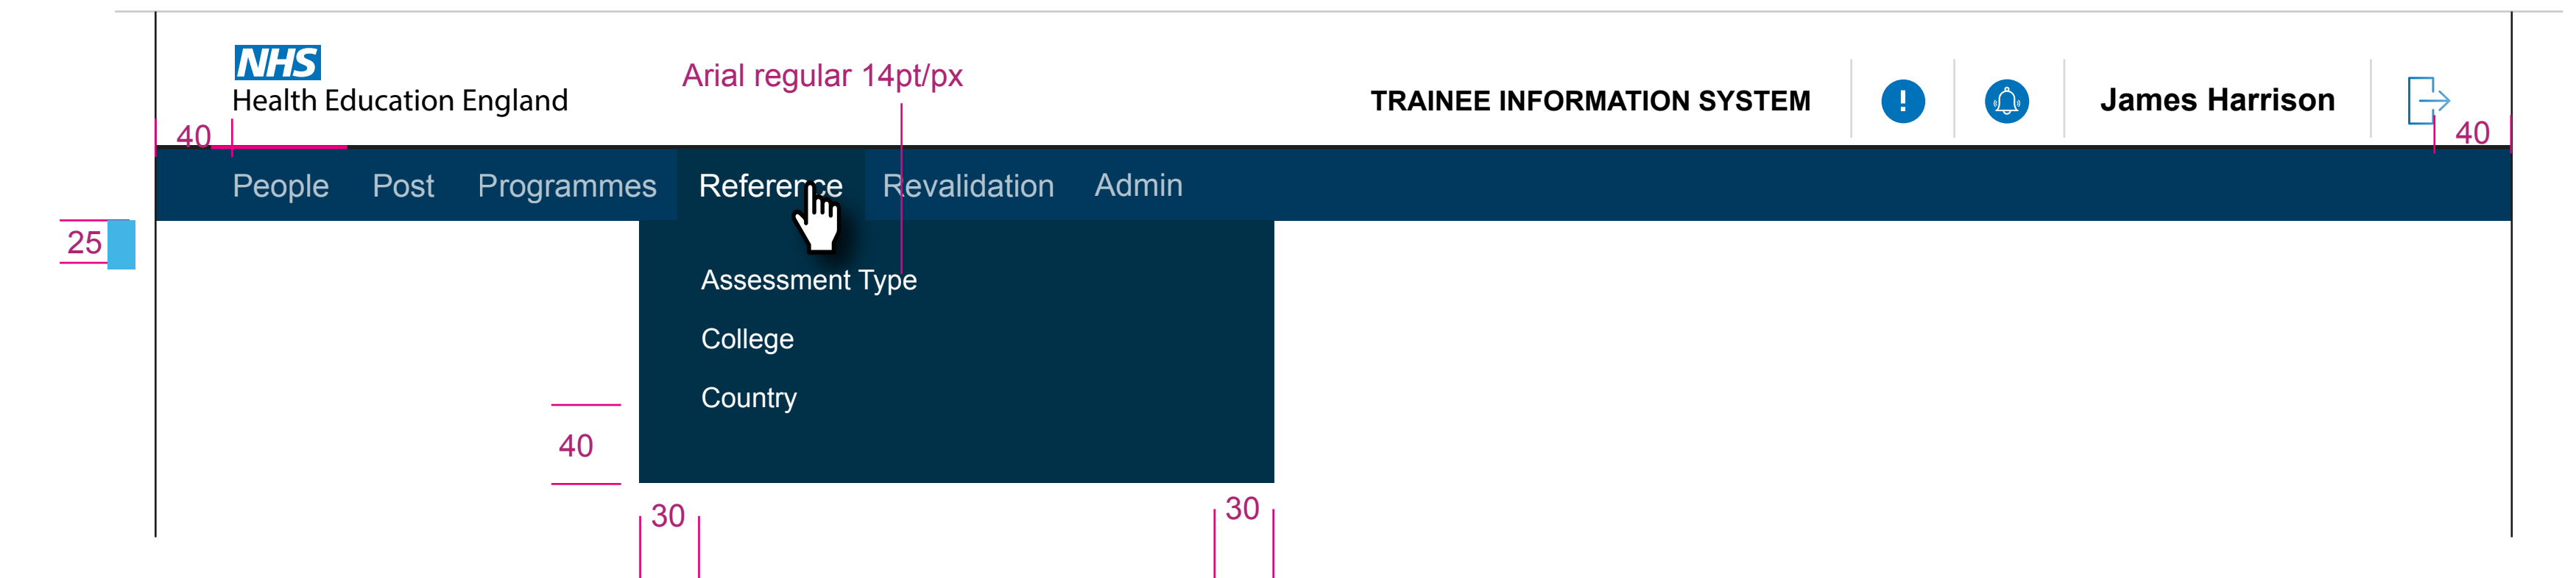

New back button on L2 mobile menu

Menu // Revised menu - Single drop down to mega menu

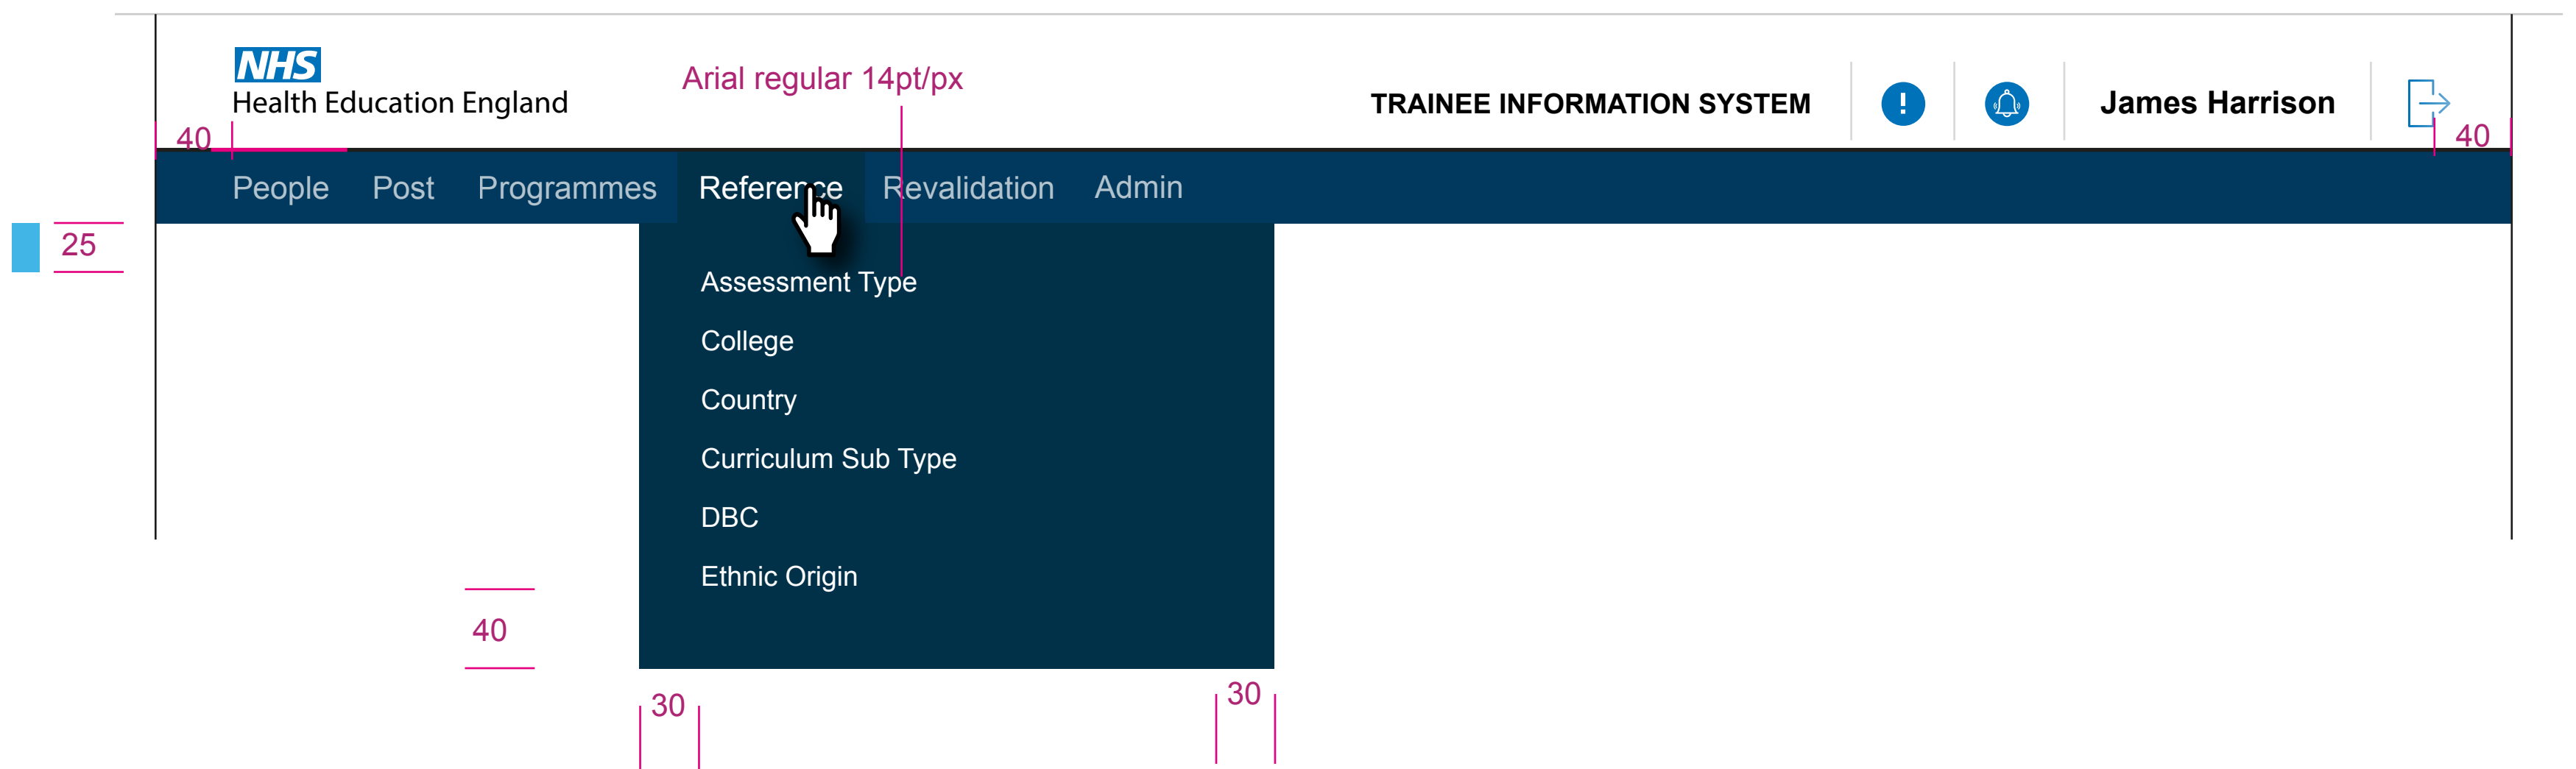

At 1200 on desktop

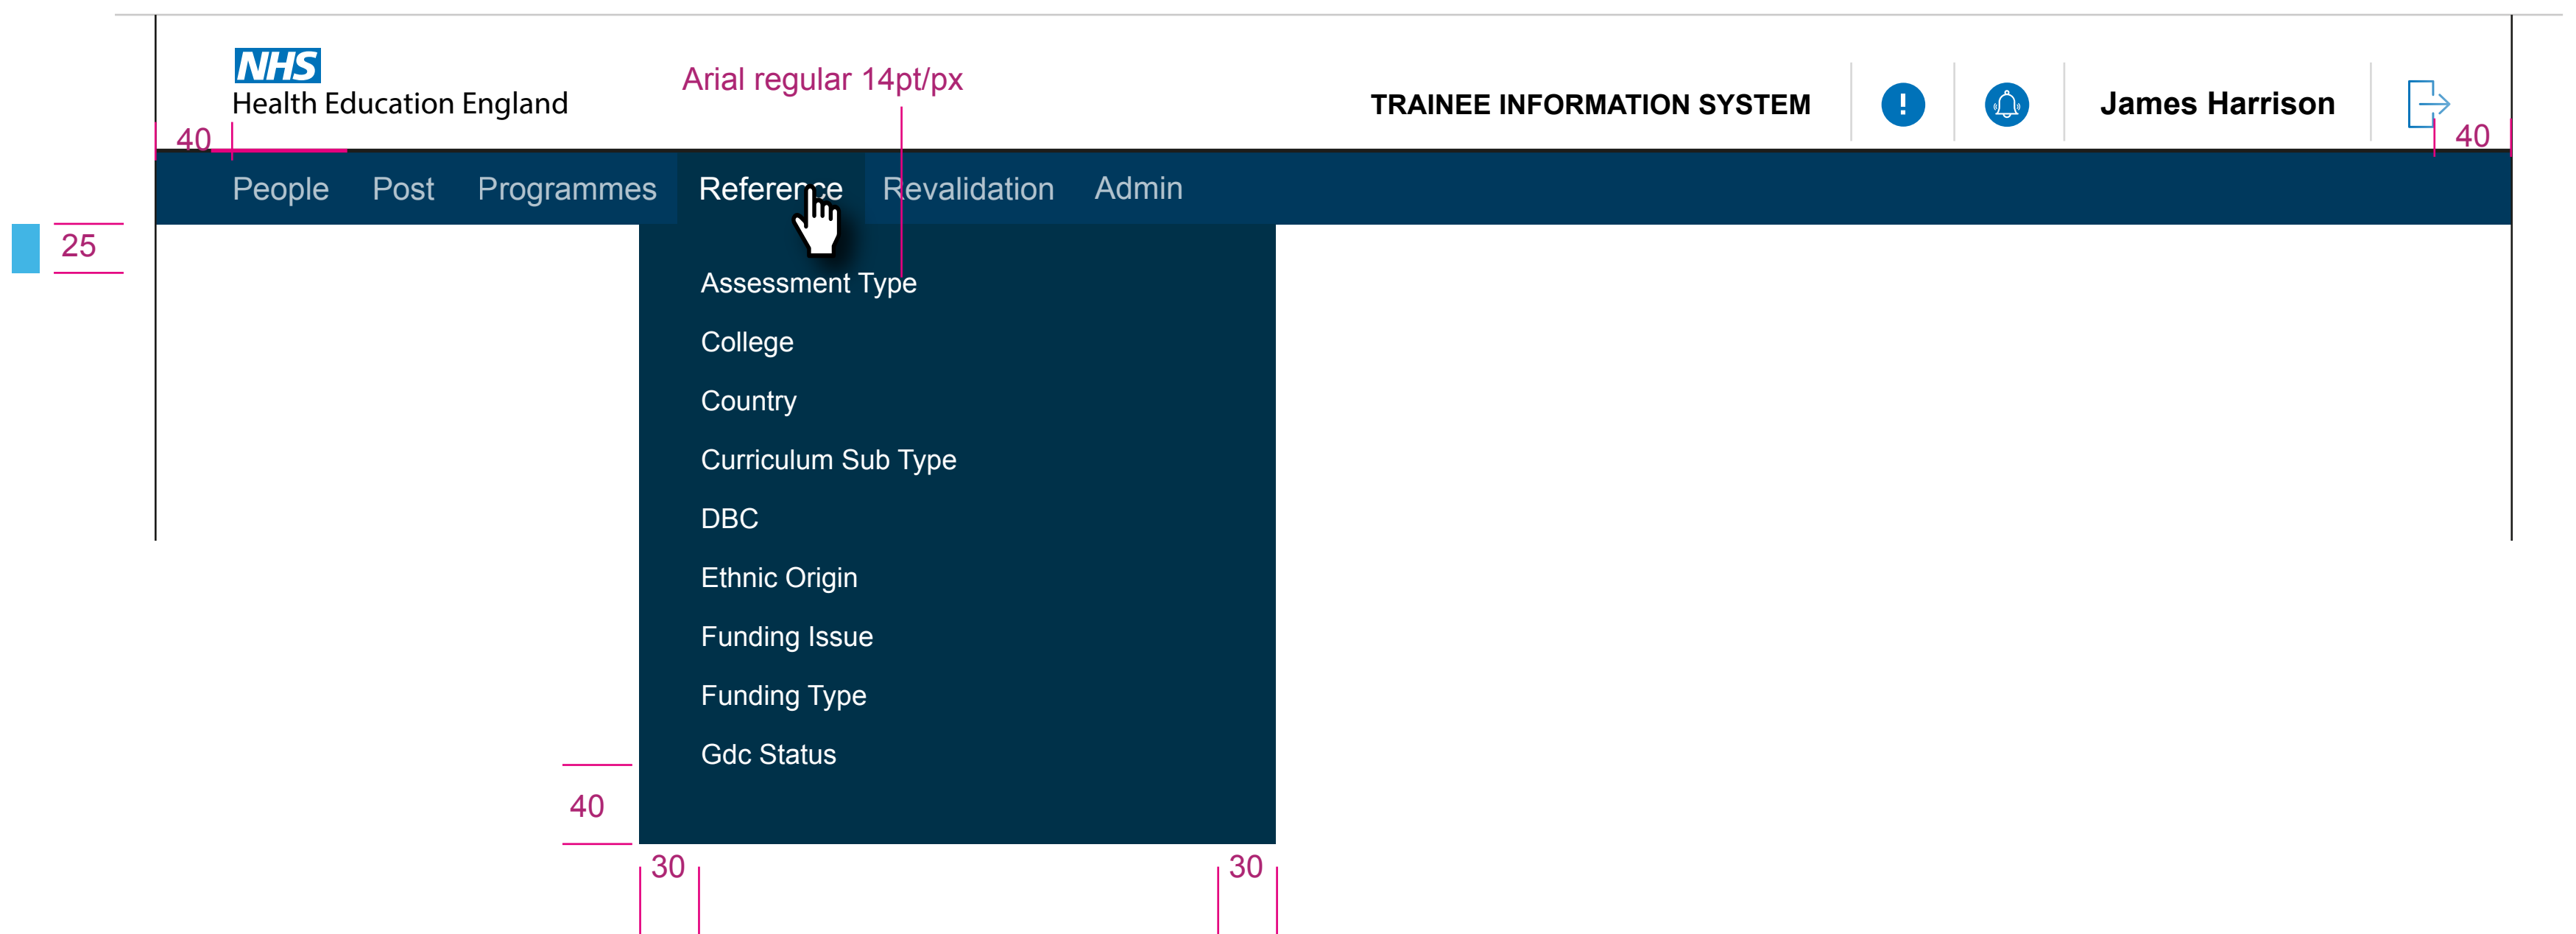

At 1200 // Aligned below on single drop down // 30 px side border // 3 items

At 1200 // Aligned below on single drop down // 30 px side border // 6 items

At 1200 // Aligned below on single drop down // 30 px side border // 9 items

At 1200 // Aligned below on single drop down // 30 px side border // 10+ items
