

Recruitment Profile

Job Title Scrum Master (Dev Team 1 or 2)

About the Job

The TIS Programme has been established to develop a suite of products and information services to support the management of learners and trainees. In so doing, we will remove a large number of legacy information systems used by local teams and offices throughout England. HEE are now seeking to become aligned with the Government Digital Service frameworks (<https://www.gov.uk/service-manual/service-standard>) that promote user centricity in software design and the adoption of agile methods by default. The TIS Programme will be the first HEE-initiative to set up an agile Development Team (agile scrums) that are supported by the business to deliver software products to our stakeholders.

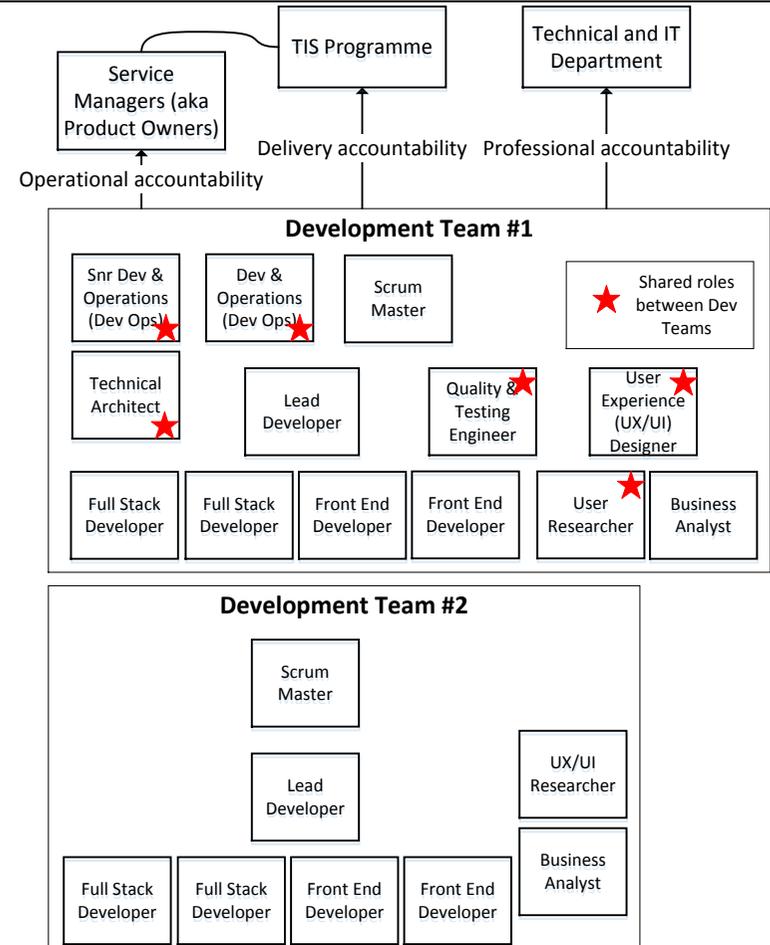

Our current backlog and requirement framework describes upwards of 20 functions and services that need to be developed to replace the legacy estate, and for those services to be continually improved and developed through time. Some of these services are large, complex and business critical, and their successful development and implementation will be the measure of success for the TIS Programme.

To be effective in this role you will be an experienced Scrum Master who can demonstrate the skills, competencies and aptitude to effectively facilitate the Development Team and to work with the Service Managers, who carry out the product owner role.

Specifically, you will:

- Have a “servant leadership” style of working and help people to develop and perform to their highest levels, putting people first and by developing consensus.

Organisation Structure

- Knowledge and experience of the Government Digital Service Manual <https://www.gov.uk/service-manual>
- Use the full range of tools and agile ceremonies/rituals to nurture and support the effective self-organising of the team.
- Build a trusting and safe team environment where problems can be raised without fear of blame, or being judged, with an emphasis of problem-solving and team responsibility.
- Support team members and set a positive culture that is focused on high quality and high velocity.
- Facilitate getting the work done without coercion, assigning, or dictating the work.
- Work effectively to remove all impediments that block the team's aim to achieve its sprint goals, and protect the team from interruptions and distractions ensuring these are addressed with the Service Managers.
- Adjust your methods of facilitation with the team depending on their level of maturity and cultural development, including effective cross-team links (i.e. with other development teams) and the wider TIS team.
- Do everything possible to ensure the business and end-users are satisfied with the end results of the development team.
- Assess and review the maturity of the scrum team and coach the team to higher levels of maturity, at a sustainable pace that is comfortable for the team.
- Facilitate discussion, decision-making, and conflict resolution.
- Assist with internal and external communication, improving transparency, and radiating information.

You will be an excellent communicator who has worked within an agile environment that is focused on delivery. You will be confident in working with end-users and be committed to quality and continuous improvement.

Health Education England (HEE) has no tradition of developing critical national systems in an agile way. This role and the adoption of the agile scrum approach is new way of working for us. Along with your colleagues

you will work to make a success of our approach to developing software and services that meet the needs of all our users.

About Us

HEE provides leadership for the education and training system. It ensures that the shape and skills of the future health and public health workforce evolve to sustain high quality outcomes for patients in the face of demographic and technological change. HEE ensures that the workforce has the right skills, behaviours and training, and is available in the right numbers, to support the delivery of excellent healthcare and drive improvements through supporting healthcare providers and clinicians to take greater responsibility for planning and commissioning education and training.

Our **ambition** is to be the best organisation of our type in the world by living our values every day.

Our Core **Values** are that everyone feels **valued and respected** and are **included and involved** in everything that affects them; are **trusted** to make decisions with clear reasons in order to **be empowered** to deliver; are committed to clear, **effective communication**, which is transparent and open when sharing information; takes **pride and has integrity** in everything we do and recognises that everyone has a significant contribution whilst taking **personal responsibility and accountability** for actions and behaviours.

Recruitment Profile

About You

This section details the personal attributes we require for this role. If you feel these describe you we would welcome your application

Behaviours and Values

- Makes sure themselves and others work in a way that complies with legislation and trust policies and procedures on health, safety and risk management
- Takes ownership for improving and maintaining a healthy, safe and pleasant work environment

- Ability to prioritise own work effectively and be able to direct the activities of others assuming line management responsibilities for a group of staff
- Capable of effective planning over medium to long term timeframes making adjustments and planning resourcing accordingly

- Ability to problem solve and respond to sudden unexpected demands
- Ability to understand a broad range of highly complex information quickly and making decisions where opinions differ/no obvious solution and makes decisions where a range of possible actions may be available
- Anticipates and resolves problems before they arise
- Ability to work and make decisions autonomously
- Guided by principles and broad policies/regulations and take action based on own interpretation
- Interpreting national policy for implementation offering subject matter expertise to influence direction
- Is a role model for team in terms of delivery of high performance and instils a culture of high performance within team and develops ability in others to manage time effectively and respond positively and flexibly to differing workloads and priorities
- Is a role model for teams in terms of quality assurance and performance and instils a culture of high quality within team
- Excellent ability to exercise high levels of diligence when assessing or preparing documentation, especially when information is received from a variety of sources and may be conflicting
- Able to maintain concentration for a prolonged period of time e.g. checking documents, writing reports and analysing statistics
- Able to maintain concentration and work effectively in a climate where there is an expectation that work patterns will have a large degree of unpredictability

<h3>Experience and Knowledge</h3>	<h3>Qualifications and Training</h3>
<ul style="list-style-type: none"> • An experienced manager, responsive to team dynamics and the development of the developers and others within the wider Development Team. You will ensure the developers are supported and developed and able to work at a high level of productivity and motivation while fostering a high degree of involvement from developers in collective accountability for architectural and technical decisions, and working in an inclusive rather than directive management manner. • To have specialist knowledge and a high level of competency as a Full Stack or a Front End developer, but able to understand both development branches. <ul style="list-style-type: none"> ○ If you are an experienced For Front End developer, you will need to: <ul style="list-style-type: none"> ▪ To have specialised knowledge and competence developing software applications at the “front-end” with particular proficiency and fluency in: <ul style="list-style-type: none"> • HTML / CSS / JavaScript / AngularJS / Grunt and be adaptable and flexible to change 	<ul style="list-style-type: none"> • Educated to masters level or equivalent level of experience of working at a senior level in specialist area • Evidence of continuing professional development

alongside evolution of practice, standards and alternative software choices.

- LESS or SASS
 - Building accessible and responsive applications, e.g. using Bootstrap
 - Version control systems such as git e.g. currently use GitHub.
 - Calling HTTP APIs (REST and SOAP)
 - Quality assurance and processes of general and team continuous quality improvement.
 - Test Driven Development (TDD) and / or Behaviour Driven Development (BDD)
 - Security
- To work heavily and understand the needs of the Development Team's business analysts and UI/UX designers and researchers in order to produce good systems and services and to understand what the user wants. This will include having non-technical discussions with the end users. This effort will, for example:
 - Turn wireframes into clickable prototypes for Alpha products
 - Build the front end elements of the Beta and Live products
 - Ensure that the front end elements align with the interaction design and the user stories
 - Ensure that the product is responsive and accessible for all users
- If you are an experienced Full Stack developer, you will need:

- To have specialised knowledge and competence in all stages of software development with proficiency and fluency in:
 - The hosting environment (currently Azure), but could be any cloud platform.
 - Data modelling, and be able to understand and create relational and non-relational data stores.
 - Object orientated experience and competence.
 - APIs and interacting with external systems and services, including writing and maintain simple APIs.
 - Quality assurance and processes of general and team continuous quality improvement.
 - Security
- The post-holder will have experience working in large agile scrum delivery projects.
- Comprehensive knowledge of project principles, techniques and tools, such as Prince 2 Foundation and Microsoft Project
- Detailed knowledge of maintaining confidentiality and implementing data protection legislation requirements including information governance
- Demonstrated experience of co-ordinating programmes and developer activities/tasks in complex and challenging environments
- Experience of developing and implementing ICT services/solutions and policy and programmes to support the delivery of team and organisational objectives and business plans
- Evidence of planning and delivering an ICT services/solutions and programmes and projects on time and within budget where impact of delivery extends beyond own area of work

- | | |
|--|--|
| <ul style="list-style-type: none">• Significant experience of monitoring substantial budgets and financial and business planning processes• Significant experience of successfully operating in a politically sensitive environment with diverse stakeholder input• Experience of identifying and interpreting national policy and researching best practice for realising policy objectives• Experience and understanding of evaluating and measuring and reporting on performance drawing on complex information from a variety of sources• Experience of managing risks and reporting• Experience of managing and working in a self-managing team and achieving objectives by working with others not under direct line management control | |
